

# WEBSITE HOSTING COMPARISON

---

SHINJIRU VS EXABYTES

## **WHY SHARED HOSTING PLANS, AN ALTERNATIVE THAT IS WAY CHEAPER WILL NOT WORK**

the website requirements currently are:

1. have users to login
2. have different users with different access levels
3. need to have some CRUD functions (add or delete folders/pdf, add users, change access levels)

these requirements make the website a dynamic one, changing contents depending on users. shared hosting plans does not accommodate dynamic websites.

**THEREFORE, NEED TO RELY ON A VPS (VIRTUAL PRIVATE SERVER), A DEDICATED SERVER FOR WEBSITES THAT MAKE THE DYNAMIC CONTENTS WORK.**

note: shared hosting plans are more suited for static websites, like blogs that does not change contents regularly between users

# PRICE COMPARISON BETWEEN THE TWO

## basic plan

note: these plans does not provide free domain name, so have to subscribe to a domain registration plan independently

second note: both plans are self-managed, with some supports from the provider company

shinjiru	criteria	exabytes
RM 2841.35	cost (3 years plan)	RM 4821.12
2 vCPUs 2 GB RAM 50 GB SSD Storage 1 IP Address Unmetered 1Gbps Bandwidth	specs	3 vCPU 3 GB RAM 60 GB SSD Disk Space 1 IP Address 3TB Monthly Data Transfer 100 Mbps Bandwidth
<ul style="list-style-type: none"><li>better data transfer rate than exabytes</li></ul>	extra features	<ul style="list-style-type: none"><li>have cpanel (basically a system where it will be more easy to monitor the server, e.g., find out how much visitors, manage database, see users, etc)</li></ul>

# CONTINUATION

basic plan +  
domain name  
registration

shinjiru	criteria	exabytes
RM 2841.35	hosting cost (3 years plan)	RM 4821.12
RM 301.86	domain registration cost (5 years plan)	RM 278.50
RM 3143.21	total	RM 5099.62

tldr: shinjiru is better in cost while exabytes is better in server management
